PERSONAL SUMMARY

Highly motivated and determined flutter developer with a passion for building high-quality mobile applications. Seeking a challenging and dynamic work environment where to utilize skills and experience to build innovative mobile applications and contribute to the growth and success of the company. Eager to learn and grow as a developer and make a meaningful impact domine and presentation layer to separate Business Logic and UI from interconnecting.

ONGOING PROJECTS

INVENTORY PRO

Github

As part of an independent project, I developed an INVENTORY MANAGEMENT SYSTEM using MVC architecture and Riverpod State Management with enhanced user experience, providing insightful analytics for better decision-making.

- This comprehensive system allows store owners to efficiently manage their inventory
- by registering stores, recording sales, purchases, returns, expenses, and stock updates.
- reporting system that generates weekly reports, graphs, and monthly sales calculations

PASSION PROJECTS

Reddit Clone App

Github

Instagram clone was built using Clean architecture and Riverpod State Management to enhance my skills. All files are separated into data, domine and presentation layer to separate Business Logic and UI from interconnecting..

- The project backend was implemented using Cloud Storage and Firestore. ● Google Auth verification enabled.
- Built majority of the functionalities of real- world Reddit does with users post.
- State management done with Riverpod

INSTAGRAM CLONE

Github

Instagram clone was built using Clean architecture enhance my skills. All filesare separated into data,

- Auth using Email & Google with user profile CD.

- Developed using Flutter, Dart and Firebase
- Built majority of the functionalities of real-world INSTAGRAM does with users post.

DRIED FRUITS APP

Github

Dried Fruits App is an online Dried Fruits ordering system that lets user's order. The application also includes features such as user authentication.it is built with Flutter and dart.
